

A Unique Approach to Business Continuity

Why We Are Different

Our tools are built to fit your organization and to grow with your needs. Business Protector lets you determine the most suitable workflows, plan structures and methodologies for your organization. As your needs evolve and change, Business Protector has proven scalability in some of the most demanding environments.

Experience Counts

BPSI has over 22 years of experience delivering technology and expertise to manage Business Continuity Programs. Our focus is delivering solutions with the highest probability of creating a successful Business Continuity Program in **your** organization, not delivering features you don't need or can't use.

- Superlative Technology
- Best price/value proposition
- Deep domain expertise on our team – Personal service and Global outlook
- Global market acceptance by SME's and Fortune 500 companies in diverse industries
- Global business continuity and risk management experience
- Scalable web-based tools for small, medium and large customers
- FOCUS – This is our only business

About Us

BPSI's Business Protector™ software tools have been used in business continuity planning worldwide since 1986. BPSI's web-based software is specifically designed to leverage the Internet for ERM and the full business continuity management life-cycle. The Business Protector solution is a portal that has been designed to "house" the planning activities of our clients. BPSI understands that Business Continuity Management is different in every organization.

Business Protector™

Leverage the power, consistency and flexibility of our database to build and manage a planning program to suit your business.

Section	Heading
1.0	Acceptance Overview - Original location Recovery Strategy - Team Members Responsibilities - Public Relations
2.0	Overview of Business Unit Business Functions/Recovery Objectives & Responsibilities
3.0	Initial Recovery Team - Activation and Notification Procedure Transportation and Assembly at the Recovery Site Recovery Site - People Summary
4.0	Critical Times Dependencies - Internal and External Command and Control - Checklist Department Staff List Critical Business Applications Business Application Dependencies Vital Records Office Equipment and Supplies Vendor Support List Territory Map

- Navigate plan sections using an intuitive browser-based interface
- Output plans to PDF format
- Upload supporting documentation in most popular file formats
- Integrate files at any hierarchical level of your plans (department, team, plan, or corporate-wide)

- Fully customizable drop-down menus and pick lists from central tables of resources (locations, people, software, hardware, vendors, etc.) provide consistency and the ability to make global changes
- Color-coded heat maps provide status reporting at a glance
- All changes and revision history tracked in the database for audit trail purposes
- Not everyone in your organization knows how to fill out a Business Continuity Plan -- Simplified data entry and page-level instructions make plan upkeep easy to learn, increasing plan participation

Non-Financial Impact

In order to evaluate the effect on the company of a business function/unit disaster that cannot be measured in financial terms (operational impact).

Please indicate the impact as: L = Low M = Medium H = High - if applicable

Impact Category	After 1 day	After 2 days	After 5 days	After 10 days	After 1 Month
Employee Morale	Low	Medium	Medium	High	High
Management Continuity/Decision Making	Low	Low	Medium	High	High
Market Image and Credibility	Low	Low	Medium	High	High
Legal or Compliance Infringements	Low	Low	Medium	Medium	High
Loss of New/Existing Business	Low	Low	Low	Medium	Medium
Regulatory Issues	Low	Low	Low	Low	Low
Other					

Legend: Low (L), Medium (M), High (H)

 - Report Cards Summary
 - Test Plans Summary
 - Progress Report
 - Dependency Reports

- Pre-configured and Ad Hoc reporting capabilities enable comprehensive program oversight
- Track dependencies, program and testing status, and plan participation
- Build custom reports and triggers on any database event
- Administrators maintain the methodology and control access to the system. The forms are logical and easily explained
- End Users maintain their plans and are granted access to their portion of the system as set by the Administrator

BPSI's scalable, easy-to-use planning tools are designed to meet the needs of companies of every size and budget, and every level of continuity planning experience. Our approach is benchmarked against best practices and regulatory requirements such as BS25999. Our solutions are offered in hosted (SaaS) and premise-based versions. Flexible licensing options enable features such as automated notification and situation management modules.
