*Security Management **Made Easy***

Visitor Registration Module

With the Visitor Registration module, visitors can be registered upon their arrival by the guard or receptionist or be pre-registered by the host or hostess or their designate and also by passing their drivers license through a scanner (4 seconds). These methods speed up entry and provide the visitor with an impression of the company's efficiency upon his/her arrival. Typical saving in time processing visitors is upwards of 1 minute per person. Visitors can be issued ID badges, printed self-adhesive badges or an electronic access card. The Visitors station can also be used to determine if the visitor needs an escort or is under a 'restricted access' order of any kind. It can also store a visitor's picture in the database for verification purposes. Records are kept in the database of the visitor's times and dates of entry and exits to a facility and their host's names. The visitor station will instantly inform the operator if a visitor has or requires, a security clearance level, requires a signature to gain access, is early or late for the appointment, as well as the type of 'identification deposit' required e.g. driver's license, passport etc., whichever is required in exchange for an electronic access badge.

- Total visitors per day, week, month
- Total visitors to a department, Site, Host
- List of visitors who required escorts and time involved
- User defined custom reports
- Repeat visitors

Visitor Pre-Registration WEB Based

Web based pre-registration over the internet or intranet days or weeks in advance of appointment using a simple data entry form.

Provide instructions to the entrance desk about who to notify and where to direct the visitor upon arrival.

Site-Secure can improve the corporate image and reduce wait time at entrance desks.

The screenshot shows a web browser window titled "Site-Secure -- Visitor Pre-Registration - Microsoft Internet Explorer". The address bar shows "http://localhost/sitesecure.net2/VisitorPrereg.aspx". The page header includes "Site-Secure", "Visitor Pre-Registration", "sysmgr", and language options for "[English]" and "[Français]".

The main form contains the following fields and controls:

- Last Name:
- First Name:
- Middle:
- Company Name:
- Title:
- Telephone:
- Contact Name :
- Contact Phone:
- Alt Contact Name:
- Alt Contact Phone:
- Site:
- Meeting Location:
- From: 2006 August 21
- Till: 2006 August 21
- Estimated Arrival Time: 11 : 00
- Purpose Of Visit:
- Details:

At the bottom of the form are three buttons: "Save", "Additional Guest", and "Exit". The browser's status bar at the bottom shows "Done" and "Local intranet".
