

## SOLUTION OF CHOICE FOR CONNECTING MIR3 IN PRODUCTS WITH ENTERPRISE INFORMATION

MIR3 inConnect™ adds value to the Intelligent Notification™ (IN) family of products by providing an easy-to-use, effective and affordable way to integrate remote data sources and applications to these products.

### MIR3 INCONNECT - TOOL FOR KEEPING NOTIFICATION-RELATED INFORMATION CURRENT IN REAL TIME

Calling people that are no longer part of the organization, calling devices that no longer exist, or calling locations that aren't manned is a waste of time and effort. In a critical situation, old data can render the best notification platform useless.

inConnect ensures accurate information 24/7/365. This tool allows the user to:

- Send data from corporate databases to inEnterprise.
- Securely forward and manage recipient contact data.
- Tightly integrate third-party databases with inEnterprise.

### THE SOLUTION OF CHOICE FOR SYSTEM INTEGRATORS, OEMS AND DEVELOPERS

inConnect installation is straightforward and easy to use. The system supports 1.3.x and 1.4.x versions of Java 1.3.1. Once the product is installed and a synchronization schedule created, data is updated at predefined intervals.

During synchronization, a check sum for records in the corporate database[s] is sent to the intermediate JDBC database. If the check sum has changed since the last synchronization, the record is then "pushed" to the IN database where the old record is overwritten.

### BENEFITS AND VALUE TO THE GLOBAL ORGANIZATION

- Maintains data integrity by updating recipient data from your master database to the MIR3 database
- Configurable default values in an easy-to-use configuration file
- Updates run automatically based on your schedule
- Flat file option covers most databases with no customization
- Easily customized for your database

PRODUCT HIGHLIGHTS

Industry-standard Web Services development platform (built on the SOAP 1.2 compliant XML J2EE standard)

Written in Java, runs on Microsoft® Windows® NT/2000/XP, Linux® and Sun® Solaris™

Connects silos of information to integrate enterprise communications and emergency notifications with business processes

Easy installation

Complete 128-bit SSL security encryption

Automated Updates

Flexible Configuration

inconnect

Welcome to the inConnect Setup program. This program will install inConnect on your computer.

It is strongly recommended that you exit all programs before running this Setup program.

Click Cancel to quit Setup and then close any programs you have running.

Click Next to continue with the Setup program.
