

# DLAN

One Unified Solution For All Your Emergency Management Needs

# Ready for a better way to manage emergencies?

Then it is time to try DLAN!

DLAN simplifies emergency response by providing a unified, mobile-friendly platform for secure communication, multi-agency collaboration, and real-time situational awareness. DLAN balances the convenience and affordability of a COTS solution with the flexibility of a custom solution tailored to your specific workflows and needs.

Emergency management isn't all about response.

That's why DLAN also includes tools for preparedness, resiliency, reporting, business continuity, and daily operations.

## Secure Hosting

On Premise, Cloud, and Hybrid Solutions

## Interoperable

Follows NIEM and NIST Guidelines

## Proven

Used in Multiple Activations Since 2002

### Task & Mission Tracking

- Log issues with easy guided data entry tools
- Assign tasks to roles responsible individually or through automated custom workflows
- Track progress with simple customizable color-coded statuses & priorities

### Visual Situational Awareness

- View critical data from multiple sources on boards and maps for improved planning and decision making
- Markup maps and share customized views
- Monitor video feeds and weather forecasts

### Resource & Contact Management

- Log resources and match them to requests
- Track the status and location of deployed assets
- Maintain personnel and organizational records, including staff training and critical infrastructure risk assessments

### Reporting

- Report on emergency situations and day-to-day operations
- Create, view, and export standard and custom reports
- Create chronological after-action reports of all activities during an incident or event

### Emergency Communication

- Alert internal and external stakeholders
- Share critical information through secure interoperable channels
- Monitor and post to social media

### Fully Configurable & Customizable

- Create custom forms, reports, templates, boards, and workflows
- Utilize organizational branding
- Integrate with existing systems, including single-sign-on options

## The Team Behind the Technology

DLAN is engineered by Buffalo Computer Graphics, Inc. (BCG), a veteran owned small business that has over 35 years of experience in software, hardware, and systems engineering. We have earned a reputation for providing superior products and excellent service to both our private sector and government customers. All of our engineering is done in house by our experienced and talented team. In addition to working closely with our customers to determine their exact needs, BCG prides itself on our ability to provide quick and expert support on all systems we have installed. Our core belief in developing relationships, not just selling products, sets us apart from our competitors.

BCG has partners with a dedicated Canadian Subject Matter Expert, FutureShield Inc., to bring DLAN to the Canadian marketplace. FutureShield's Founder and President, Cynthia Weeden, has over 30 years of recognized experience in strategic leadership roles. Cynthia offers her expertise to assist the leaders in Canadian emergency management, including critical infrastructure and government organizations, as they work to integrate innovative technology into their daily operations. In 2021 Cynthia was selected by Women's Executive Network, as one of Canada's Most Powerful Women: Top 100 2021 Award Winners in the category of BMO Entrepreneurs.
